

COLLABORATIVE INTERNSHIP PROGRAM

Building tomorrow's conservation leaders

This program offers training across multiple ecosystems to teach skillsets needed to manage varied habitats while providing leadership development critical to successful careers in wildlife conservation and management with state, federal, or private wildlife conservation agencies and organizations.

Program Details

- Housing, on-site transportation, travel stipend, and weekly \$400 stipend will be provided
- One Texas A&M and one Clemson student will be selected for this exchange program for Fall 2023
- Internships will be at Rob & Bessie Welder Wildlife Foundation (Sinton, TX) and Nemours Wildlife Foundation (Yemassee, SC)

Student Requirements

- Undergraduate student or recent graduate
- Majoring in wildlife biology, ecology and/or management or a related natural resources field
